The Book of Genesis Chapter 3 verse 1

Now the serpent was more subtil than any beast of the field which the LORD God had made.
And he said unto the woman, Yea, hath God said, Ye shall not eat of every tree of the garden?

Genesis

by James Murray

The Book of Genesis Chapter 3 verse 2

And the woman said unto the serpent, We may eat of the fruit of the trees of the garden:

Who are the victims?

China first harvested organs from executed prisoners in the 1970s. It later started using organs from prisoners of conscience and minorities on a small scale.

Since 2000, those targeted for organ harvesting have been primarily practitioners of Falun Gong, a traditional meditation practice, whose adherents seek to cultivate the qualities of truthfulness, compassion, and tolerance. By the end of the 1990s, the Chinese government estimated that over 70 million citizens were practicing Falun Gong.

Yet, the Communist Party's former leader Jiang Zemin saw Falun Gong's popularity as a threat to his rule and launched a campaign to "ruin their reputations, bankrupt them financially, and destroy them physically." Since 1999, Falun Gong practitioners have been arrested and tortured in prisons, labor camps, and secret detention facilities for refusing to renounce their faith.

Worldwide Response

In June 2016, the U.S. House of Representatives unanimously passed House Resolution 343 condemning "the systematic, state-sanctioned organ harvesting from non-consenting prisoners of conscience" in China.

In December 2013, the European Parliament adopted an emergency resolution calling on the Chinese regime "to end immediately the practice of harvesting organs from prisoners of conscience and members of religious and ethnic minority groups."

Israel, Spain, Italy, and Taiwan have passed laws criminalizing organ trafficking and restricting transplant tourism to China.

Freedom House released a report in 2017 citing its own review of "credible evidence suggesting that ... Falun Gong detainees were killed for their organs on a large scale."

Since May 2015, more than 200,000 Chinese citizens have filed criminal complaints against former Communist Party leader Jiang Zemin, who initiated and orchestrated the persecution of Falun Gong.

How You Can Help

- Learn about this issue at ChinaOrganHarvest.org and tell others about it.
- Contact your representatives to draft and support legislation that prevents individuals and institutions from becoming complicit
- Sign a petition and join the millions who have spoken out against this crime

The China Organ Harvest Research Center conducts and presents authoritative research on non-consensual organ harvesting in China. Our decade-long systematic study has formed the basis of independent reports cited by CNN, *The New York Times*, PBS, and *The Globe and Mail*.

ChinaOrganHarvest.org

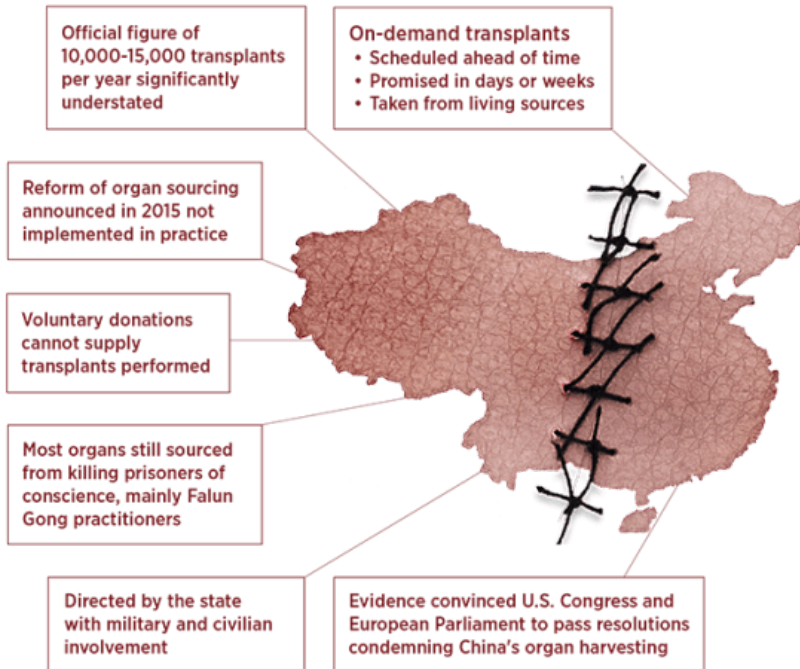

Ongoing Killing of Prisoners of Conscience for Organs in China

- Official figure of 10,000 transplants each year significantly understates the real volume
- Number of donations cannot supply transplants performed
- Reform of organ sourcing announced in 2015 not implemented in practice
- Most organs still taken from unwilling prisoners of conscience, mainly Falun Gong practitioners
- Directed by the state with military and civilian involvement

Reported on by CNN, Newsweek, PBS, The Times of London

CHINA ORGAN HARVEST RESEARCH CENTER

TRANSPLANT ABUSE IN CHINA CONTINUES

China came to perform the most transplants in the world in just a few years after 2000 despite the lack of an organ donation system.

In 2015, Chinese authorities announced that they had stopped sourcing organs from death-row prisoners and completely transitioned to voluntary donors.

The latest research finds that the donation system can supply far fewer organs than transplants performed. The Chinese regime continues to kill prisoners of conscience for organs on demand.

China is now expanding agreements to share organs with other regions in Asia and beyond.

Zoé Valdés, *Acclaimed Cuban Writer and Professor*

“The removal of organs from imprisoned Chinese dissidents is an atrocious, cruel, barbaric practice, typical of the worst crimes of the Middle Ages, and typical of Communism.

Money helps hide the horror. China pays, they say. The goal is to shatter, to tear down, to annihilate, to erase through the murder of credibility and actual murder.”

Robert Spalding, *Retired Air Force Brigadier General, Senior Director at the National Security Council*

The Chinese regime leverages the global economy to create political outcomes that favor their interests. The CCP uses information and finance “to desensitize, to deflect any criticism on understanding of things like the mass incarceration and organ harvesting of the Falun Gong. They particularly [oppress] those that the Chinese Communist Party fears.”

Alaska

The state of Alaska is shown in a light blue color, indicating its position relative to the rest of North America. It is the largest state in the United States by area.

North Atlantic Ocean

The North Atlantic Ocean is shown in a light blue color, indicating its position relative to the rest of North America. It is the largest body of water in the world.

Great Lakes

The Great Lakes are shown in a light blue color, indicating their position relative to the rest of North America. They are the largest group of freshwater lakes in the world.

Rockies

The Rocky Mountains are shown in a light blue color, indicating their position relative to the rest of North America. They are the largest mountain range in the world.

Canada

Canada is shown in a light blue color, indicating its position relative to the rest of North America. It is the second largest country in the world by area.

United States of America

The United States of America is shown in a light blue color, indicating its position relative to the rest of North America. It is the third largest country in the world by area.

Mexico

Mexico is shown in a light blue color, indicating its position relative to the rest of North America. It is the largest country in Central America.

Great Lakes Region

The Great Lakes Region is shown in a light blue color, indicating its position relative to the rest of North America. It is the largest group of freshwater lakes in the world.

Rockies

The Rocky Mountains are shown in a light blue color, indicating their position relative to the rest of North America. They are the largest mountain range in the world.

Great Plains

The Great Plains are shown in a light blue color, indicating their position relative to the rest of North America. They are the largest flatland in the world.

Rockies

The Rocky Mountains are shown in a light blue color, indicating their position relative to the rest of North America. They are the largest mountain range in the world.

Great Plains

The Great Plains are shown in a light blue color, indicating their position relative to the rest of North America. They are the largest flatland in the world.

Great Lakes Region

The Great Lakes Region is shown in a light blue color, indicating its position relative to the rest of North America. It is the largest group of freshwater lakes in the world.

Introduction

The purpose of this map is to provide a comprehensive overview of North America, including its geographical features, population, and economic activity. It is based on the most up-to-date data available.

Map History

This map was created using the latest technology and data. It is the most accurate and detailed map of North America available.

Map Features

The map includes a variety of features, including topographic contours, political boundaries, and major cities. It is designed to be easy to use and understand.

Apparatus for audibly communicating speech using the radio frequency hearing effect

US 6587729 B2

ABSTRACT

A modulation process with a fully suppressed carrier and input preprocessor filtering to produce an encoded output, for amplitude modulation (AM) and audio speech preprocessor filtering, intelligible subjective sound is produced when the encoded signal is demodulated using the RF Hearing Effect. Suitable forms of carrier suppressed modulation include single sideband (SSB) and carrier suppressed amplitude modulation (CSAM), with both sidebands present.

Apparatus and method for remotely monitoring and altering brain waves

US 3951134 A

ABSTRACT

Apparatus for and method of sensing brain waves at a position remote from a subject whereby electromagnetic signals of different frequencies are simultaneously transmitted to the brain of the subject in which the signals interfere with one another to yield a waveform which is modulated by the subject's brain waves. The interference waveform which is representative of the brain wave activity is re-transmitted by the brain to a receiver where it is demodulated and amplified. The demodulated waveform is then displayed for visual viewing and routed to a computer for further processing and analysis. The demodulated waveform also can be used to produce a compensating signal which is transmitted back to the brain to effect a desired change in electrical activity therein.

Thought transmission unit sends modulated electromagnetic wave beams to human receiver to influence thoughts and actions without electronic receiver

DE 10253433 A1

ABSTRACT

A thought transmission unit sends modulated electromagnetic wave beams over long distances to a human receiver to influence the thoughts, actions, or perceptions of the organism with or without their consent but without them requiring an electronic receiver.

DESCRIPTION Translated from German

Background of the Invention
Field of the Invention
 (0007) The invention relates to long range and long range telepathy need reading. Applicants exclude the extension of the traditional means of communication, supporting public appearances of important people and important negotiations, the shipment of important risk phases in emergency situations, the active avoidance of significant risks, the investigation of criminals who support brain research. Here are limitations of conventional methods of information transfer, such as mobile phone, radio and television, overcome.

CLAIMS (3) Translated from German

1. Radio means, characterized in that - the radio relay device generates banded modulated electromagnetic radiation and transmits to a human recipient, - the carrier frequency of the banded modulated electromagnetic radiation of between 10^9 Hz (= 1 MHz) and 10^{14} Hz (= 100 THz) is located, - a modulation frequency of the carrier frequency between 0.01 Hz and 10^{11} Hz (= 100 GHz), - the distance between the radio relay apparatus and the receiver is more than 10 m, - acting the combined modulated electromagnetic radiation on the body of the receiver is such a way that a substantial likelihood that a proposed modification of the thoughts or actions of the organism is associated.

Electric fringe field generator for manipulating nervous systems

US 6081744 A

ABSTRACT

Apparatus and method for manipulating the nervous system of a subject through afferent nerves, modulated by externally applied weak fluctuating electric fields, tuned to certain frequencies such as to excite a resonance in neural circuits. Depending on the frequency chosen, excitation of such resonances causes in a human subject relaxation, sleepiness, sexual excitement, or the slowing of certain cortical processes. The electric field used for stimulation of the subject is induced by a pair of field electrodes charged to opposite polarity and placed such that the subject is entirely outside the space between the field electrodes. Such configuration allows for very compact devices where the field electrodes and a battery-powered voltage generator are contained in a small casing, such as a powder box. The stimulation by the weak external electric field relies on frequency modulation of spontaneous spiking patterns of afferent nerves. The method and apparatus can be used by the general public as an aid to relaxation, sleep, or arousal, and clinically for the control and perhaps the treatment of tremors and seizures, and disorders of the autonomic nervous system, such as panic attacks.
