The Book of Revelation Chapter 22 verse 11

"He that is unjust, let him be unjust still: and he which is filthy, let him be filthy still: and he that is righteous, let him be righteous still: and he that is holy, let him be holy still."

by James L. Murray

The Book of Revelation Chapter 21 verse 27 (NIV)

Nothing impure will ever enter it, nor will anyone who does what is shameful or deceitful, but only those whose names are written in the Lamb's book of life.

Califia in a mural at Disney's California Adventure

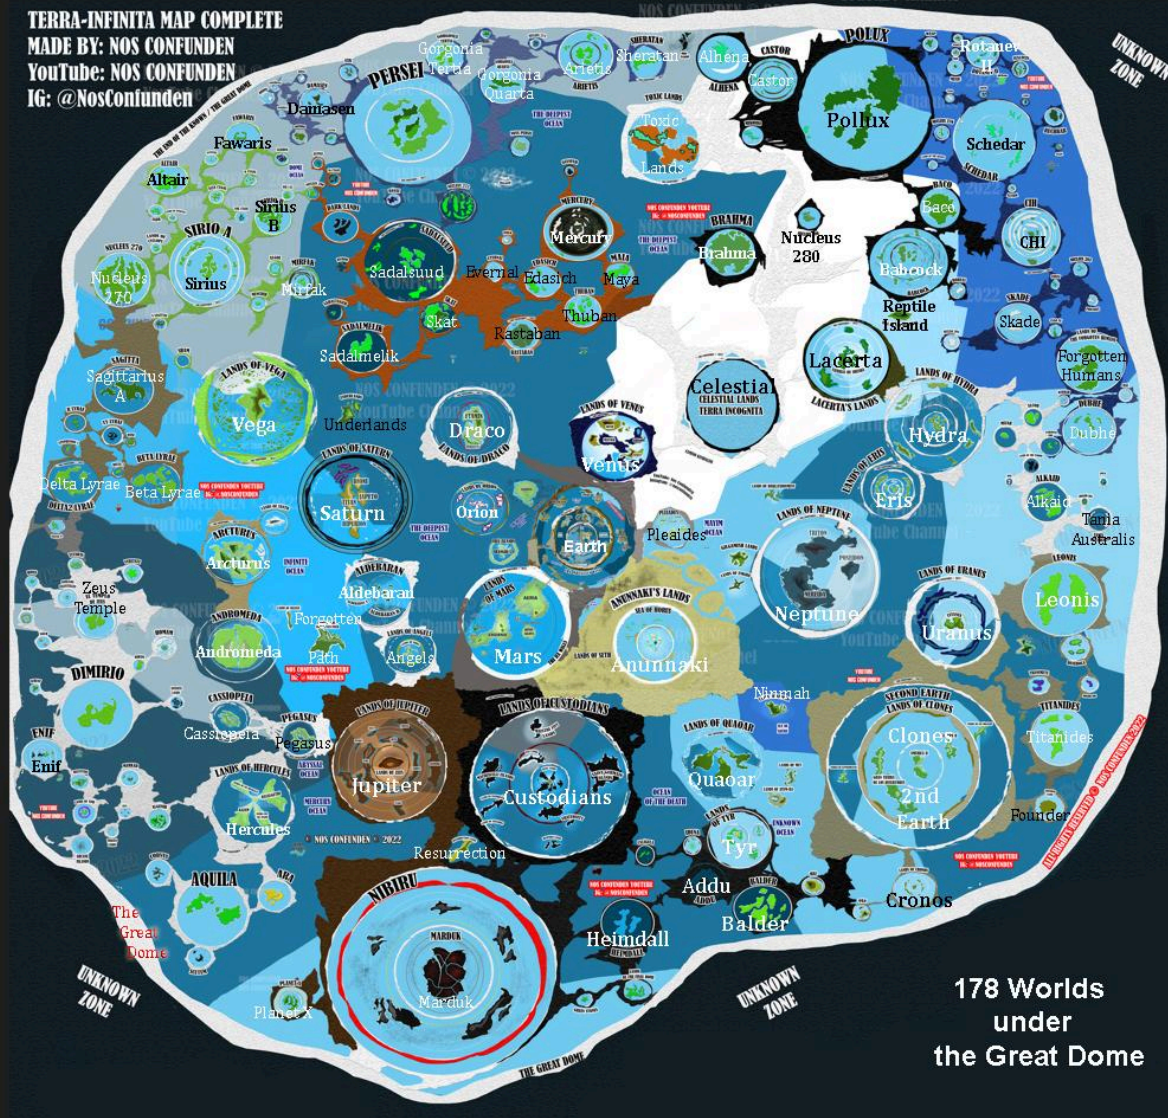

California Named After 15th Century African Queen Califia?

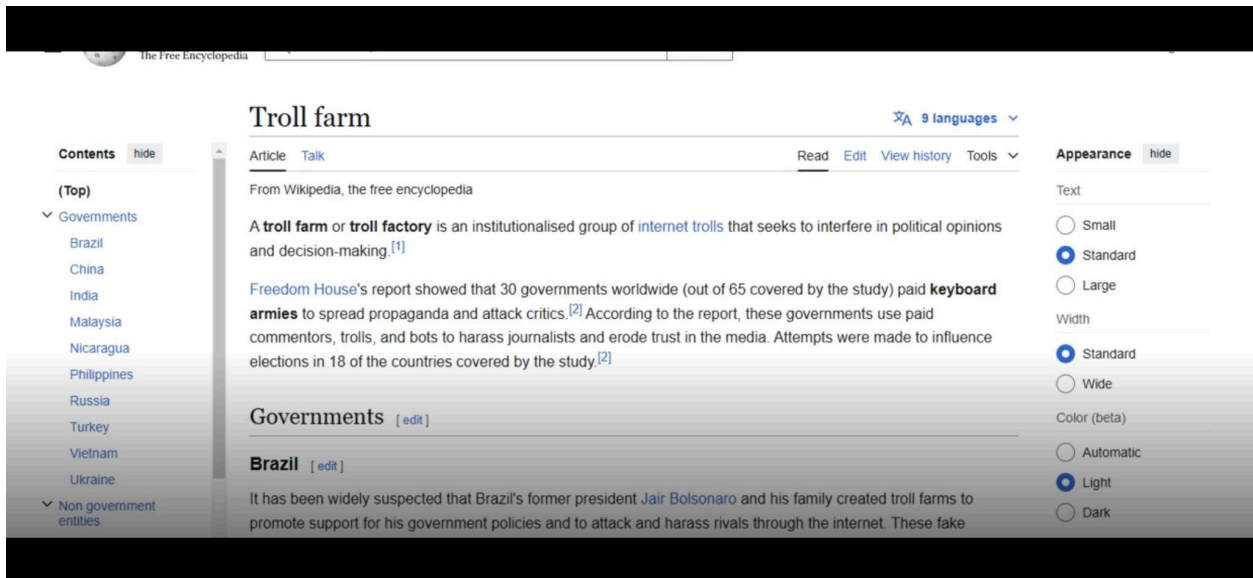

By saying she was African means not necessarily birthplace but by descent and facial features being full nosed and mouthed with a tendency to wooly, wiry hair. The various legends of Califia are found web page. On the page itself, we do not consider her historicity but could have been queen in Baja California. Myth says that the state evidence proves affirmative, the more likely someone like her could in Baja. Was there gold? Yes. The California Gold Rush proves it; and prehistoric African figures are found in gold. (2) TO POPULATE Baja, Africans would have to be able to either reach it from across the American continent or from the north and south Pacific in prehistoric times; could they? Yes. a) The yellow-circled 4000 BC Negrito cranium from Tennessee along with the 2000 BC yellow-circled Mississippi pipe-head shows cross-continental possibility; b) the Olmec goddess on the yellow square (1800 BC Mexico) & green-bordered Polynesian pictures (right) show the possibility of African South Pacific boat movement to Baja; c) From an average of 7000 BC, Washington state shows yellow-circled dolicocephalic (African) Keniwick and Stick Man being a prehistoric African population en-route to Baja from the Northern Pacific. (3) PREHISTORIC RED AND BLACK STICK FIGURES found in Africa should be found in Baja and are. (4) AFRICAN STYLE PREHISTORIC BOATS with the towering gondolier should be found across the ocean and are found in North America.

CONCLUSION: We wanted to investigate hard evidence of a widespread, seagoing, gold-using African people existing in and around pre-Columbian Baja. As the evidence is strongly affirmative, whether Califia existed or not, an African queen like her is 95% certain.

Becoming a YouTube Troll

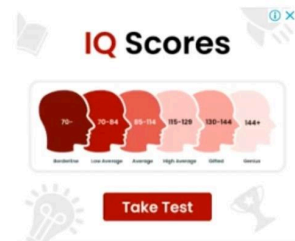

Did you know it pays to be a troll on YouTube?

No, really.

All those controversial topics and entries that you'd never dream of discussing in the real world could make you thousands of dollars on YouTube if done correctly. However, the art of trolling is a lot harder than it seems, and you must be a gifted troll to accomplish the seemingly impossible.

HOW COVERT AGENTS INFILTRATE THE INTERNET TO MANIPULATE, DECEIVE, AND DESTROY REPUTATIONS

Glenn Greenwald
February 24 2014, 5:25 p.m.

The Intercept

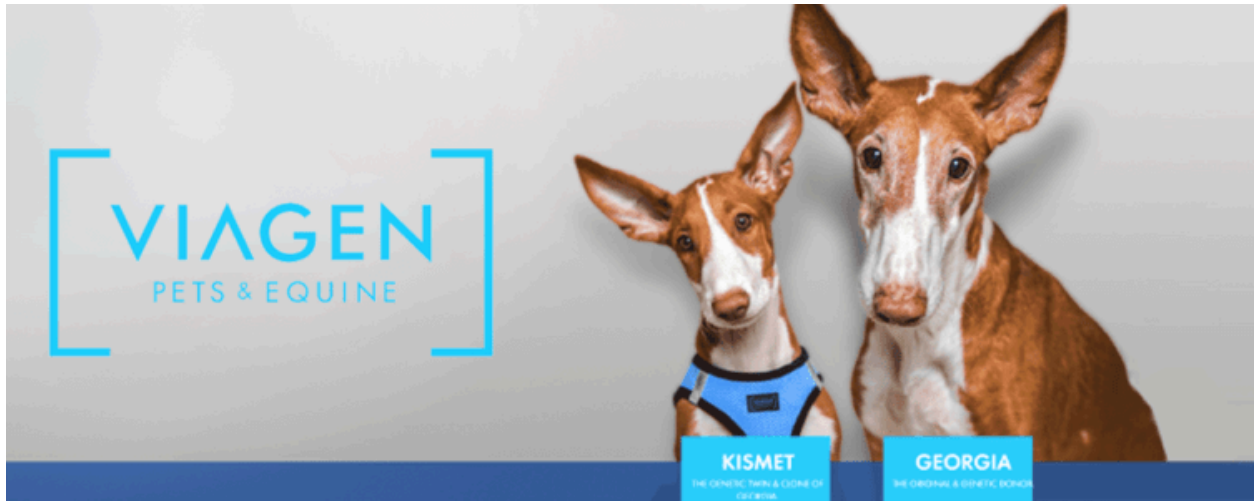

One of the many pressing stories that remains to be told from the Snowden archive is how western intelligence agencies are attempting to manipulate and control online discourse with extreme tactics of deception and reputation-destruction. It's time to tell a chunk of that story, complete with the relevant documents.

Over the last several weeks, I worked with NBC News to publish a series of articles about "dirty trick" tactics used by GCHQ's previously secret unit, JTRIG (Joint Threat Research Intelligence Group). These were based on four classified GCHQ documents presented to the NSA and the other three partners in the English-speaking "Five Eyes" alliance. Today, we at *the Intercept* are publishing another new JTRIG document, in full, entitled "The Art of Deception: Training for Online Covert Operations."

By publishing these stories one by one, our NBC reporting highlighted some of the key, discrete revelations: the monitoring of YouTube and Blogger, the targeting of Anonymous with the very same DDoS attacks they accuse "hacktivists" of using, the use of "honey traps" (luring people into compromising situations using sex) and destructive viruses. But, here, I want to focus and elaborate on the overarching point revealed by all of these documents: namely, that these agencies are attempting to control, infiltrate, manipulate, and warp online discourse, and in doing so, are compromising the integrity

What is Genetic Preservation?

Search

Genetic Preservation

a service offered by ViaGen Pets

Genetic Preservation is the process of storing your pet's DNA for future use and often the first step toward cloning. At ViaGen Pets, we safely cryopreserve your pet's genetic material so it can be preserved indefinitely.

It starts with a biopsy kit and your veterinarian.

#1

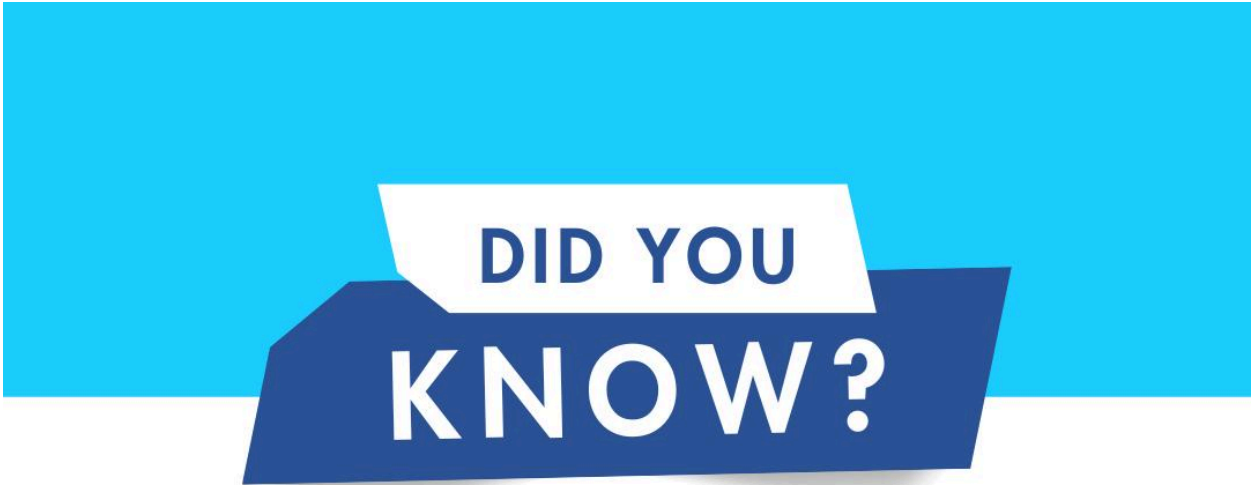

How can I preserve the genetics of my pet long-term?

Your pet's genes can be preserved on a long-term basis through Viagen's genetic preservation (GP) service. Our genetic preservation (GP) process is conducted in three steps.

1. We send you a Viagen Biopsy Kit, which your veterinarian will use to collect a tissue sample from your cat or dog. Your veterinarian will then send that tissue sample to Viagen.
2. We culture new cells in our lab from your pet's tissue sample. This allows us to ensure that the cells are ultimately usable to clone your pet – if you choose to do so.
3. We cryopreserve (freeze) these live cells for growing at a later time if desired.

DID YOU KNOW?

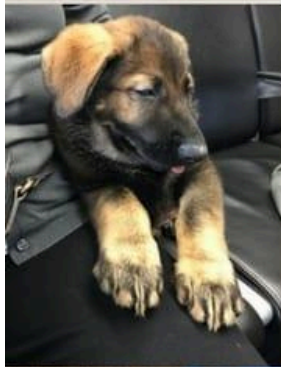

Cloning Helps Save Endangered Species!

Viagen has cloned several black-footed ferrets and Przewalski's horses, both endangered species! Cloning offers hope for preserving rare animals for future generations!
