### Presenting the Anti-Boredom Connection

You've heard of electronic TV games. Probably even played them. So you know that, though they're fun at first, they tend to get old. And Boring.

Enter the Fairchild Video Entertainment System. It plays home TV games with plug-in cartridges. Rather than being a game, it's an entire selection of them. That's why we like to think of it as the anti-boredom connection.

**Three Components.** It takes three elements to make our System. Your TV. The console, which attaches to your TV. And the Videocart™ cartridges which plug right into the console.

#### And How They Work.

Since you already know how the first element (your TV) works, we'll start with the second.

**The console:** It's like a mini-computer. Once connected to your TV set, it turns the screen into an electronic playing field for the game of your choice.

Individual hand controllers, attached to the console, send information from you to the playing field.

A trademark of Fairchild Camera and Instrument Corporation.

So that you can move your "players" and control the action anywhere on the screen.

Two games are built into the console to start. Hockey and Tennis. And, when you're ready for new challenges, there's lots more fun in store.

Read on.

**The Videocart™ Cartridges:** Each Videocart™ cartridge contains up to four brand new video games. It looks, and behaves, just like the kind you'd play in a stereo tape deck. The difference, however, is that a Videocart™ cartridge is like a computer punch card containing an actual program with the information needed to set your TV up for the game of your choice.

The Videocart™ game cartridges are what make the Fairchild system a true electronic symphony. With the ability to play up to so many different kinds of games, there will always be the right one. No matter who the player, what the skill level or when the occasion.

### An Expandable Library of Video Game Fun.

Expandability. That's the real beauty of our system. Because new Videocart™ cartridges are going to keep coming... and coming. So that, chances are, no matter how many games you've mastered, there'll always be a new one to test your abilities.

Right now, there are three Videocart™ cartridges available. Bringing the total number of games playable on our System to ten (including Hockey and Tennis).

**Videocart™-1**—Pits you against the system. Four single player games include an electronic version of Tic-Tac-Toe, Shoot the Gun, Doodle and Screen becomes the canvas for your electronic masterpieces and Quadra-Doodle (the screen doodles for you in colorful, kaleidoscope patterns).

**Videocart™-2**—Invites you and a friend to let out your hunting instincts in Desert Fox (a fiercely competitive tank battle) and Shooting Gallery, an electronic skeet shoot.

**Videocart™-3**—Says "Bring on the sharpies!" Video Blackjack deals you into a heavy game against a Big Time dealer (your TV) in one and two player versions.

#### ... Standard Console Features:

- Variable motion control—adjusts the speed of play to any skill level.
- Time limit selection—varies the length of the game.
- Remote hand controllers—for full screen play action.

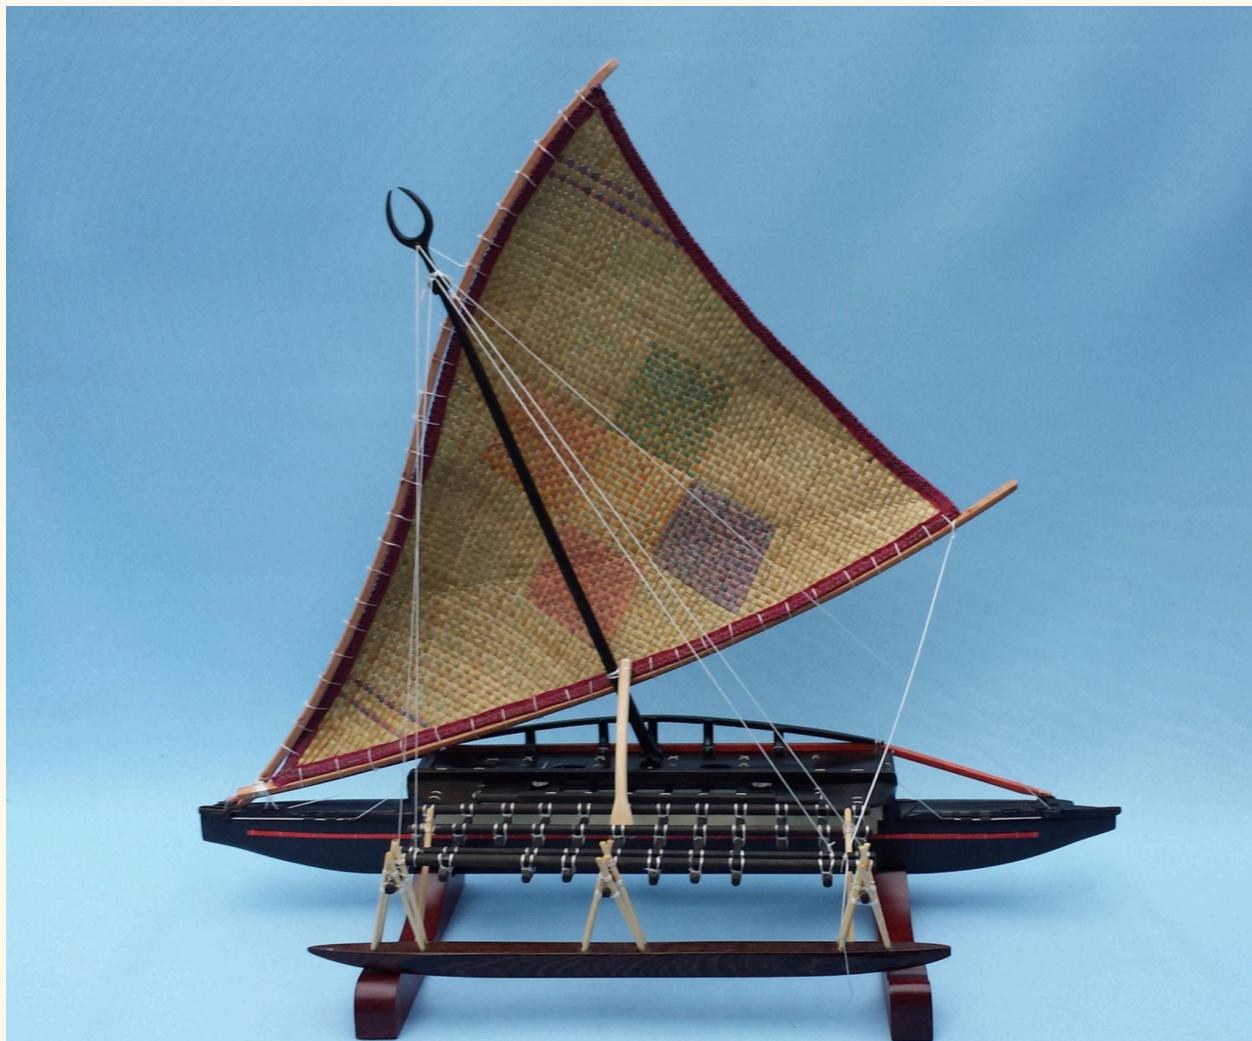

- Game-freeze switch—to hold the game in place in case you want to take a break.
- Electronic sound effects—adds to the excitement.
- Full color tracking—no mistaking your player for your opponent's.
- Operates on regular household current—no batteries needed.
- Easy hook-up for any size or brand Black and White or color TV. (Game play in color on color televisions).
- Automatic on-screen scoring and timekeeping.
